

What Do I Do If I Am Struggling In A Class?

- 1.If you are struggling in a class, it is very important to meet with your teacher. Communication between the student and teacher is necessary in order to be successful in the classroom.
- 2.It is also important for parents to discuss their student's struggles in a particular class with the teacher. Teachers can be reached by email or you can leave a message for the teacher to call you.
- 3.The high school offers Intervention Labs for math, science, and english throughout the school day. However, the intervention times may not work with your schedule, and therefore you will need to make alternate arrangements to meet with your teachers for extra help. Teachers are willing to stay after school, and some even before school to help students. Remember.....Communication is key!!!!
